# eForms

SIGNATURE CAPTURE

dbtech SOLUTIONS

BENEFITS:

- Simplify your form creation process
- Sign forms electronically on a Topaz device
- Enter form information electronically via PC, laptop or tablet
- Instant form changes
- Streamline workflows with auto print & barcode scan
- Bedside registration
- Save on third-party form design & printing

GO INTERACTIVE!

Take your organization's forms completely interactive with dbtech Ras and eForms.

You'll save on third-party form design and printing while benefitting from electronic signature capabilities, bedside registration, instant form changes and the ability to enter information electronically via PC, laptop or tablet devices.

What's more, Ras works in tandem with Adobe Acrobat Form Wizard – you'll only need one full version – so editing and completing forms is performed seamlessly on a familiar, industry-proven platform.

1. BUILD eForms IN ADOBE ACROBAT
2. ADD eForm TO Rasi
3. SELECTED eForm APPEARS IN ACROBAT *(for signature capture & field completion)*
   SAVE
4. COMPLETED eForm SENT BACK TO Rasi BY SIMPLY CLICKING "SAVE"
5. UPDATED eForm APPEARS AUTOMATICALLY IN THE PATIENT FOLDER

THE PROCESS IS SIMPLE

Once a form is built, users need only to add the new eForm to Rasi. Then, when that form is selected in Rasi, it automatically appears in Adobe Acrobat where it can be completed and signed.

Simply click "save", and the completed form is sent back to Rasi where it appears instantly in the appropriate patient folder.

It's that easy. We've done the work so you won't have to.
